

# **EUROPEAN PROCESSOR INITIATIVE AND EU PROJECTS TOWARDS EXASCALE COMPUTING**

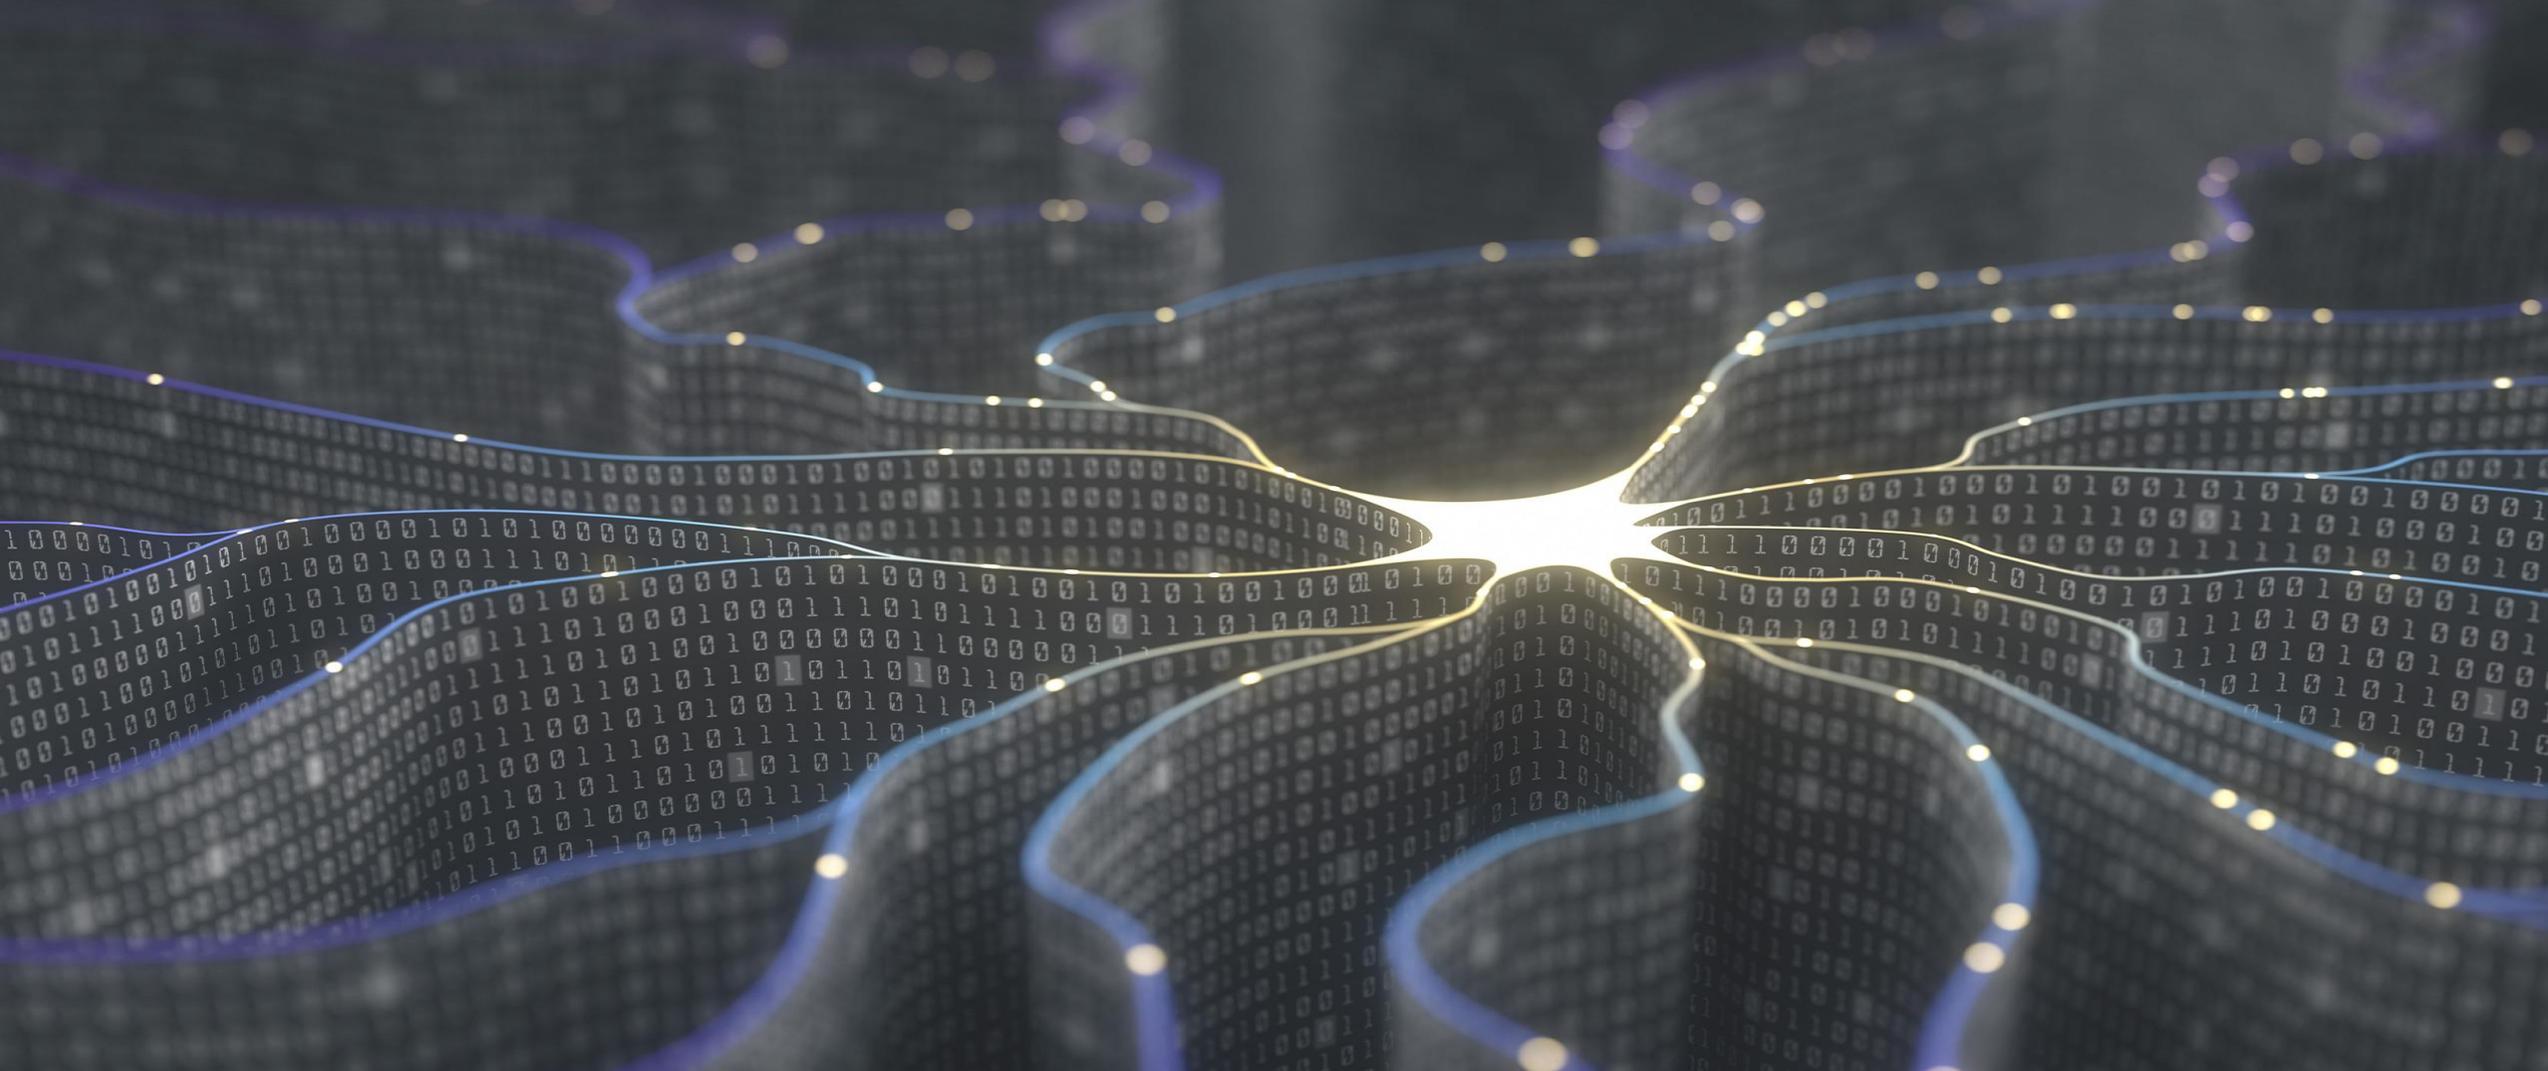

**Mario Kovač, EPI Chief Communication Officer**

**[mario.kovac@european-processor-initiative.eu](mailto:mario.kovac@european-processor-initiative.eu); [mario.kovac@fer.hr](mailto:mario.kovac@fer.hr)**

THIS PROJECT HAS RECEIVED FUNDING FROM THE EUROPEAN UNION'S HORIZON 2020 RESEARCH AND INNOVATION PROGRAMME UNDER GRANT AGREEMENT NO 826647

# ***THE STRATEGIC INTERPLAY***

# THE PRESIDENT OF THE EUROPEAN UNION HAS SET NEW AMBITIONS

SEPTEMBER, 16TH, 2020

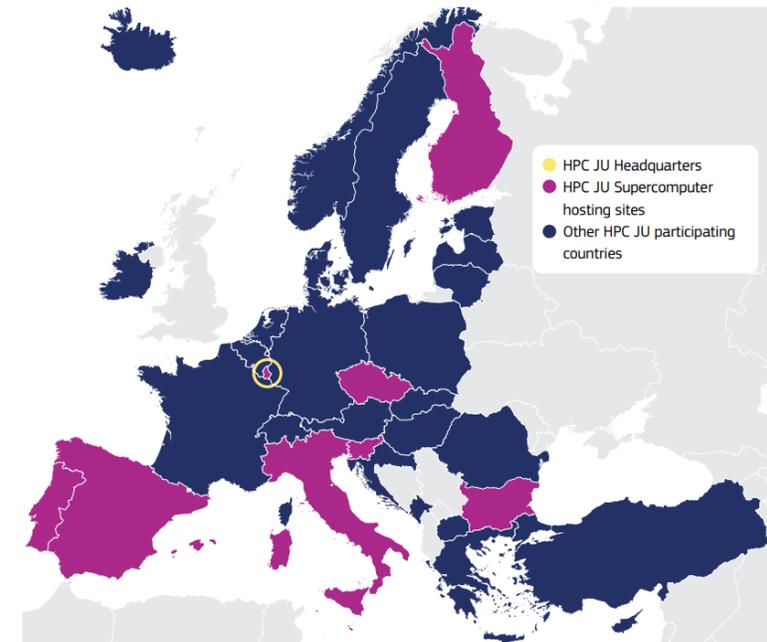

## Ursula Von Der Lyen State of the Union *Brussels – September, 16<sup>th</sup>, 2020*

- NextGenerationEU is also a unique opportunity to develop a more coherent European approach to connectivity and digital infrastructure deployment.
- None of this is an end in itself - it is about Europe's digital sovereignty, on a small and large scale.
- **We want the European industry to develop our own next-generation microprocessor** that will allow us to use the increasing data volumes energy-efficient and securely.
- This is what **Europe's Digital Decade** is all about!

[https://ec.europa.eu/commission/presscorner/detail/en/SPEECH\\_20\\_1655](https://ec.europa.eu/commission/presscorner/detail/en/SPEECH_20_1655)

# EU EXASCALE HPC STRATEGY

- March 2017, Rome: EC launched the *EuroHPC declaration*
- November 2018, EuroHPC Joint Undertaking, a 1 billion Euro joint initiative between the EU and European countries to develop a World Class Supercomputing Ecosystem in Europe
- 13.7.2021.: EU Council established new EuroHPC JU
  - the 27 Member States, 6 other countries, 2 Private Members
  - €7 billion investment

# EUROHPC JU AMBITIOUS MISSION

- **Supercomputers**
  - reaching the next frontier of high-performance computing: the acquisition of exascale supercomputers
- **Interconnectivity**
  - interconnection through terabit networks of this supercomputing infrastructure, as well as in allowing access from the cloud to a large number of public and private users from anywhere in Europe
- **Applications for life**
  - further development of novel scientific and industrial applications
- **Skills and engagement with business**
  - increased investment in skills, education and training in the use of HPC, co-investment with industry in the acquisition of dedicated systems and in the development of large-scale industrial applications, creation of HPC Centres of Excellence
- **Technology activities**
  - the development of high-end European technologies, for example in the [European Processor Initiative](#) (EPI)

**FUTURE**  

---

**START**

# DRIVERS OF THE EPI PROPOSAL

## Societal challenges

- Climate change
- Cybersecurity
- Increasing energy needs
- Intensifying global competition
- Aging population
- Sovereignty (data, economical, embargo)

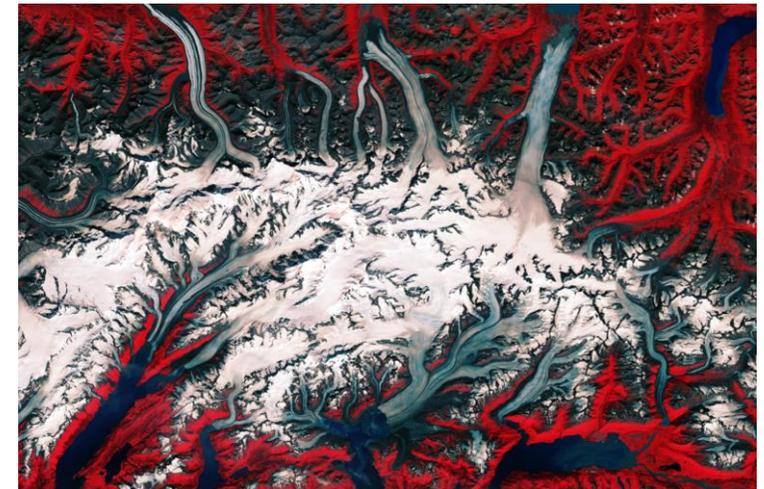

Image: <https://www.combiomed.eu/services/software-hub/>

## DRIVERS OF THE EPI PROPOSAL

- Connected mobility & *Autonomous Driving computing needs beyond 2023*
- Develop customized processors able to meet the performance needed for autonomous vehicles that would offer:
  - implementation of vehicle perception tasks in real-time in a fail-operational manner
  - increased computing performance, fail-operational, functional safety, cyber-security and real-time behaviour (RT)
  - compute resources with the same characteristics as their “big brothers” in exascale class supercomputers
- Sovereignty (data, economical, embargo)
- EU car manufacturing supremacy

# European Processor Initiative

# 28 PARTNERS FROM 10 EU COUNTRIES

# EPI OBJECTIVES

- Overall: Develop a complete EU designed high-end microprocessor, addressing Supercomputing and edge-HPC segments
- Short-term objective
  - supply the EU-designed microprocessor to empower the EU Exascale machines
- Long-term objective
  - Europe needs a sovereign (=not at risk of limitation or embargo by non-EU countries) access to high-performance, low-power microprocessors, from IP to products
- EPI has been set to fulfil this objective
- EPI has to cover all Technical Readiness levels (TRL)
  - TRL 1-3 are for long-term objectives (EU IP)

\*and\*

  - TRL 4-9 are for short to mid-term objectives (decade) with products designed in EU

# MERGE OF HPC AND AI

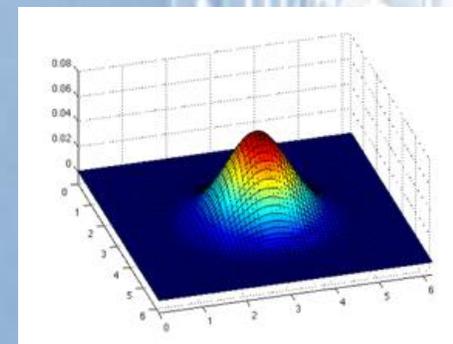

# HPC BEFORE ARTIFICIAL INTELLIGENCE

Theoretical model  $\longrightarrow$  HPC Application  $\longrightarrow$  Results

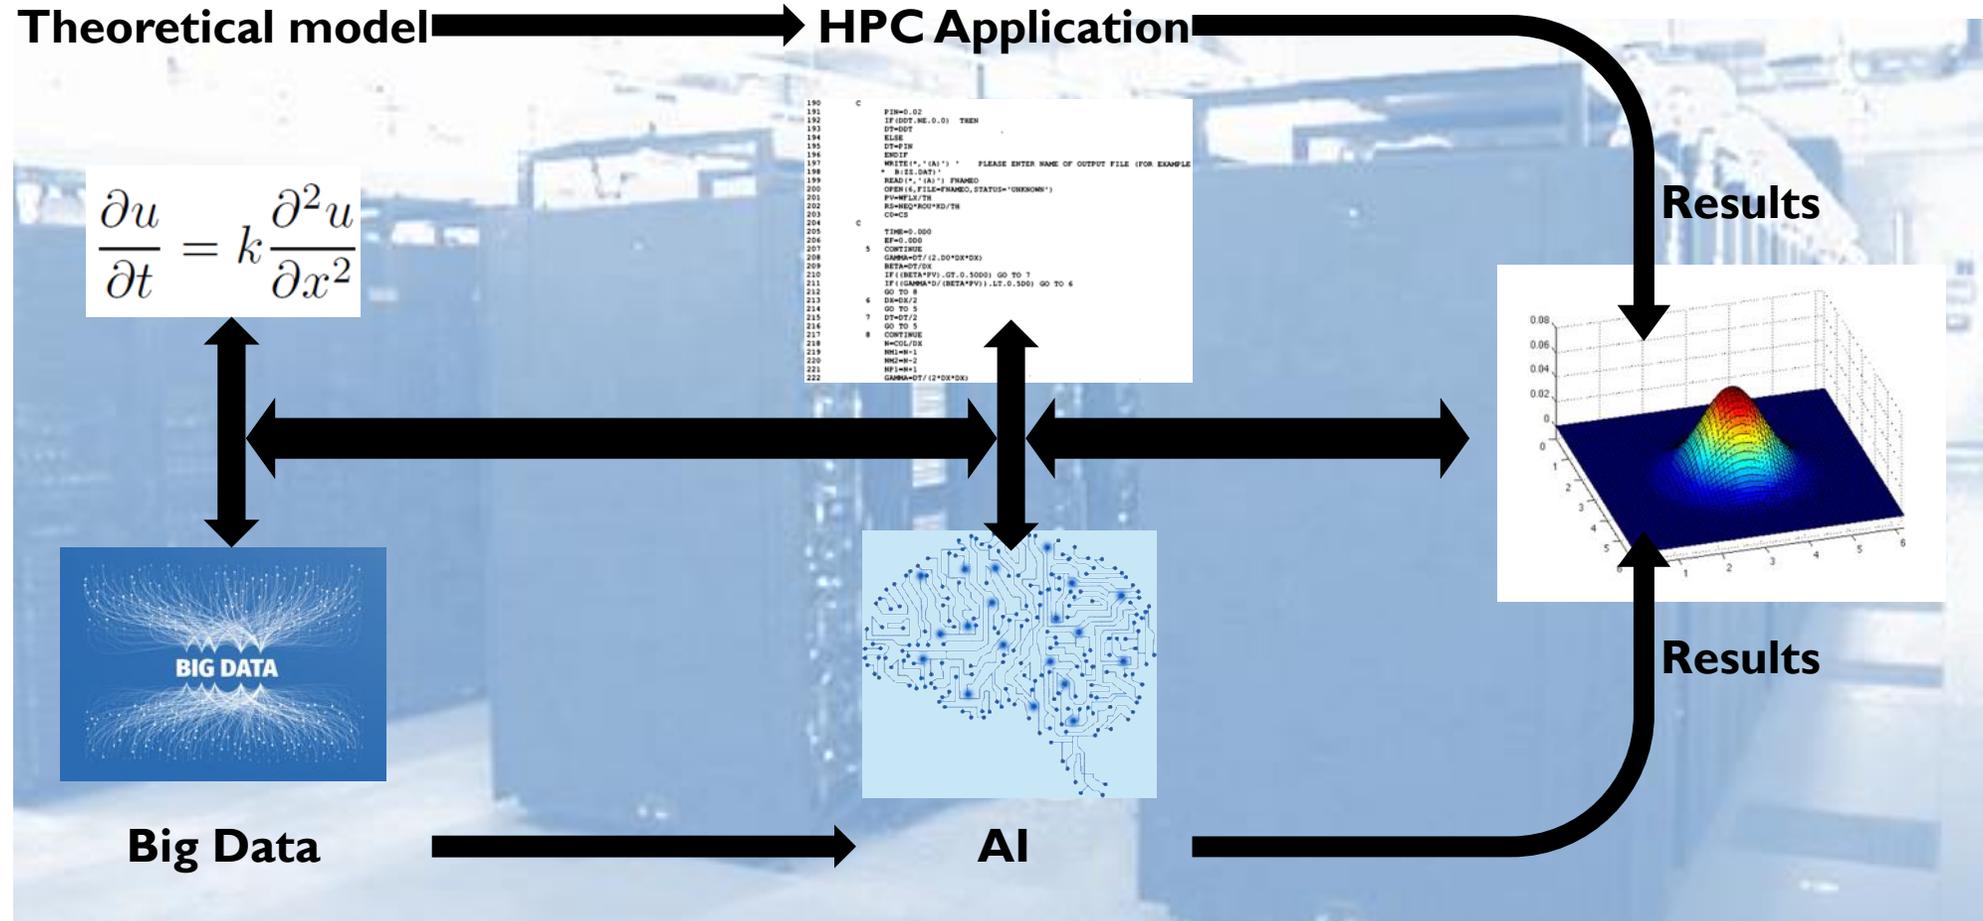

$$\frac{\partial u}{\partial t} = k \frac{\partial^2 u}{\partial x^2}$$

```

**Cambrian explosion**  
**Achieving performance through specialization**

## TOP10 (GREEN) OVER THE LAST 10 YEARS

	2009 – Nov.	2014 – Nov.	2020 – Nov.	(Post) Exascale
CPU <u>only</u>	9	5	2	0
CPU + ACC.	1	5	8	10

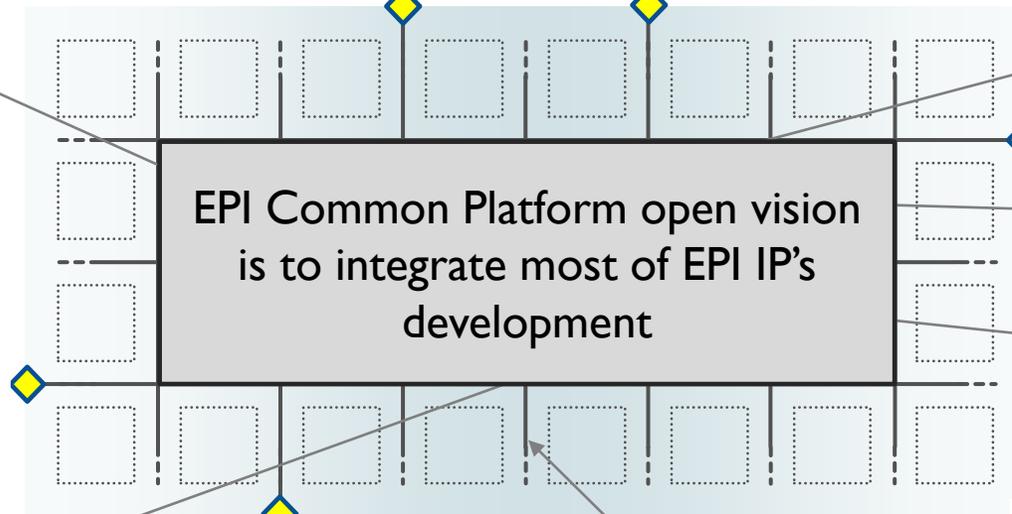

# ***THE EPI TECHNOLOGY: COMMON PLATFORM***

# GPP AND COMMON ARCHITECTURE

ZEUS  
(ARM)

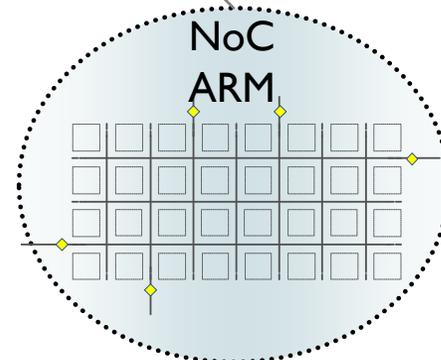

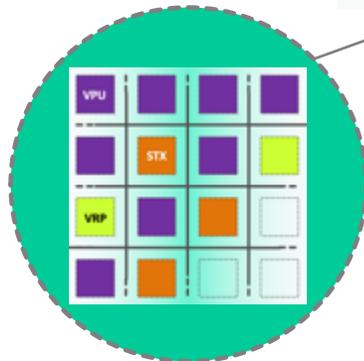

CCIX (RHEA)  
CCIX & CXL (CRONOS)

Kalray

Dedicated  
cryptographic  
IP

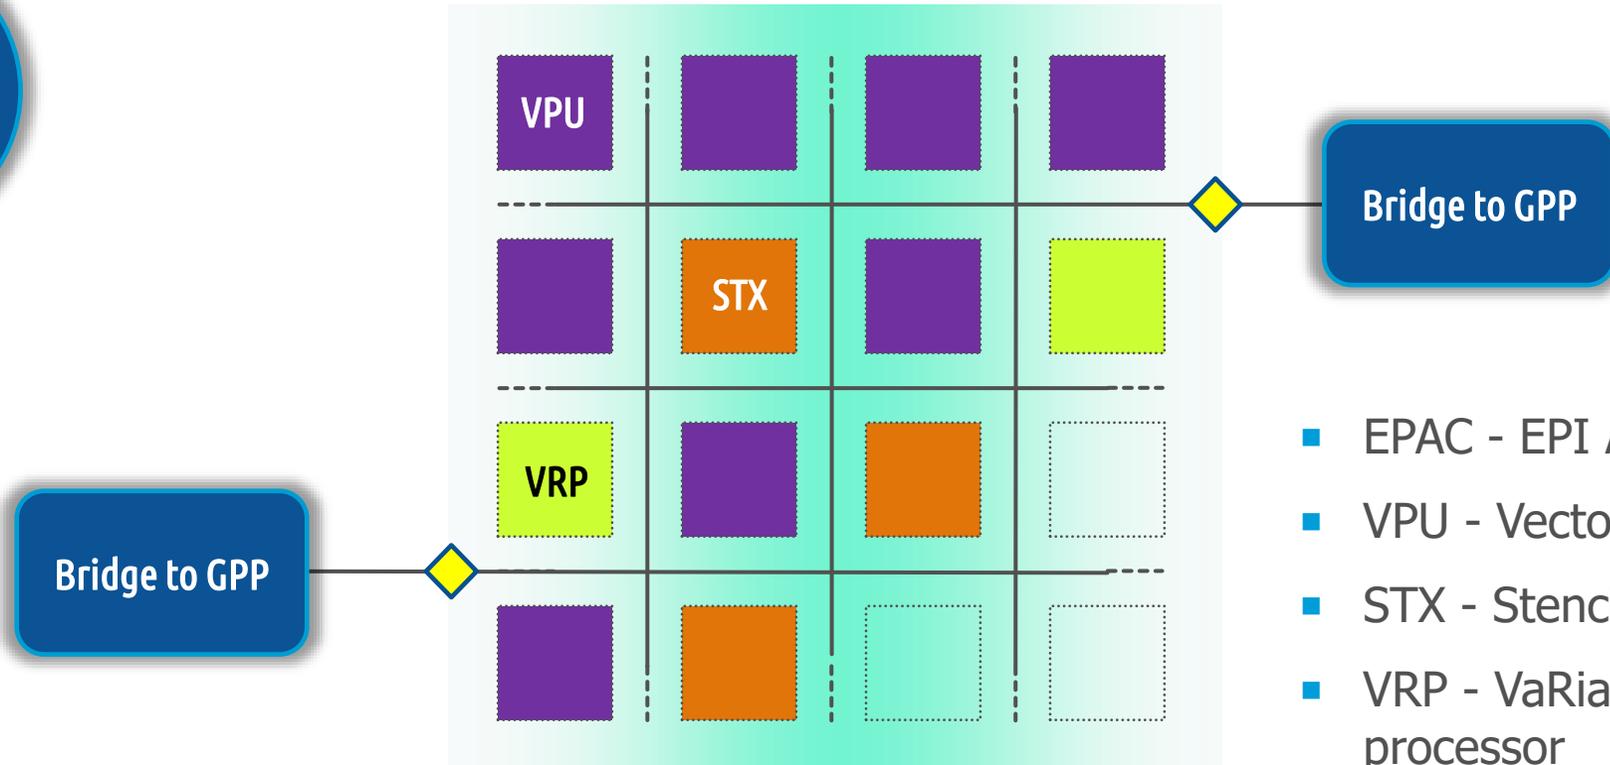

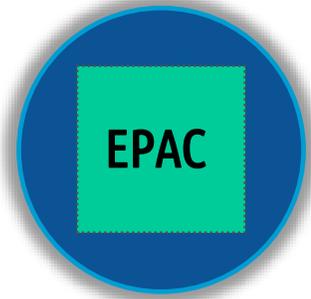

FPGA  
Menta  
(FR)

- Network on Chip (NoC) – ARM
- CPU – ARM – ZEUS
- EPAC – EPI Accelerator
- MPPA – Multi-Purpose Processing Array
- eFPGA – embedded FPGA
- Cryptographic ASIC (EU Sovereignty)
- Any other ASIC

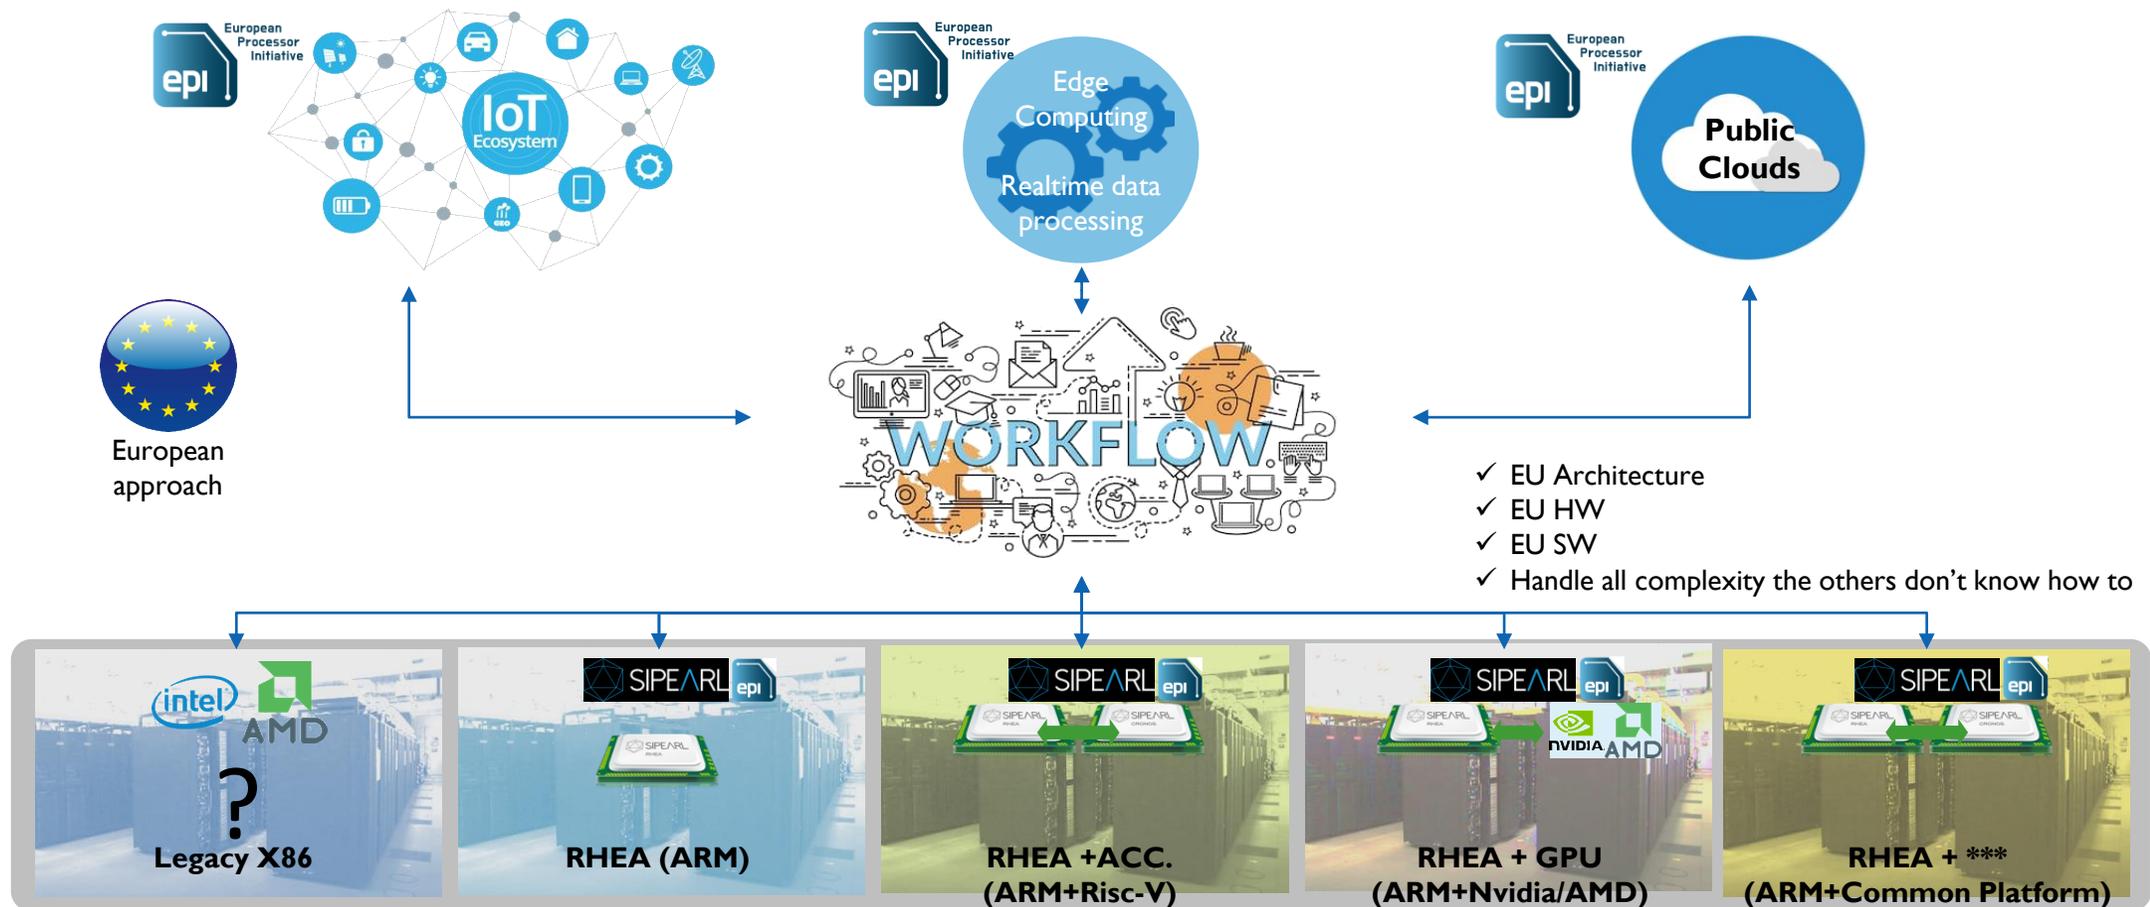

# ***THE EPI TECHNOLOGY: ACCELERATORS***

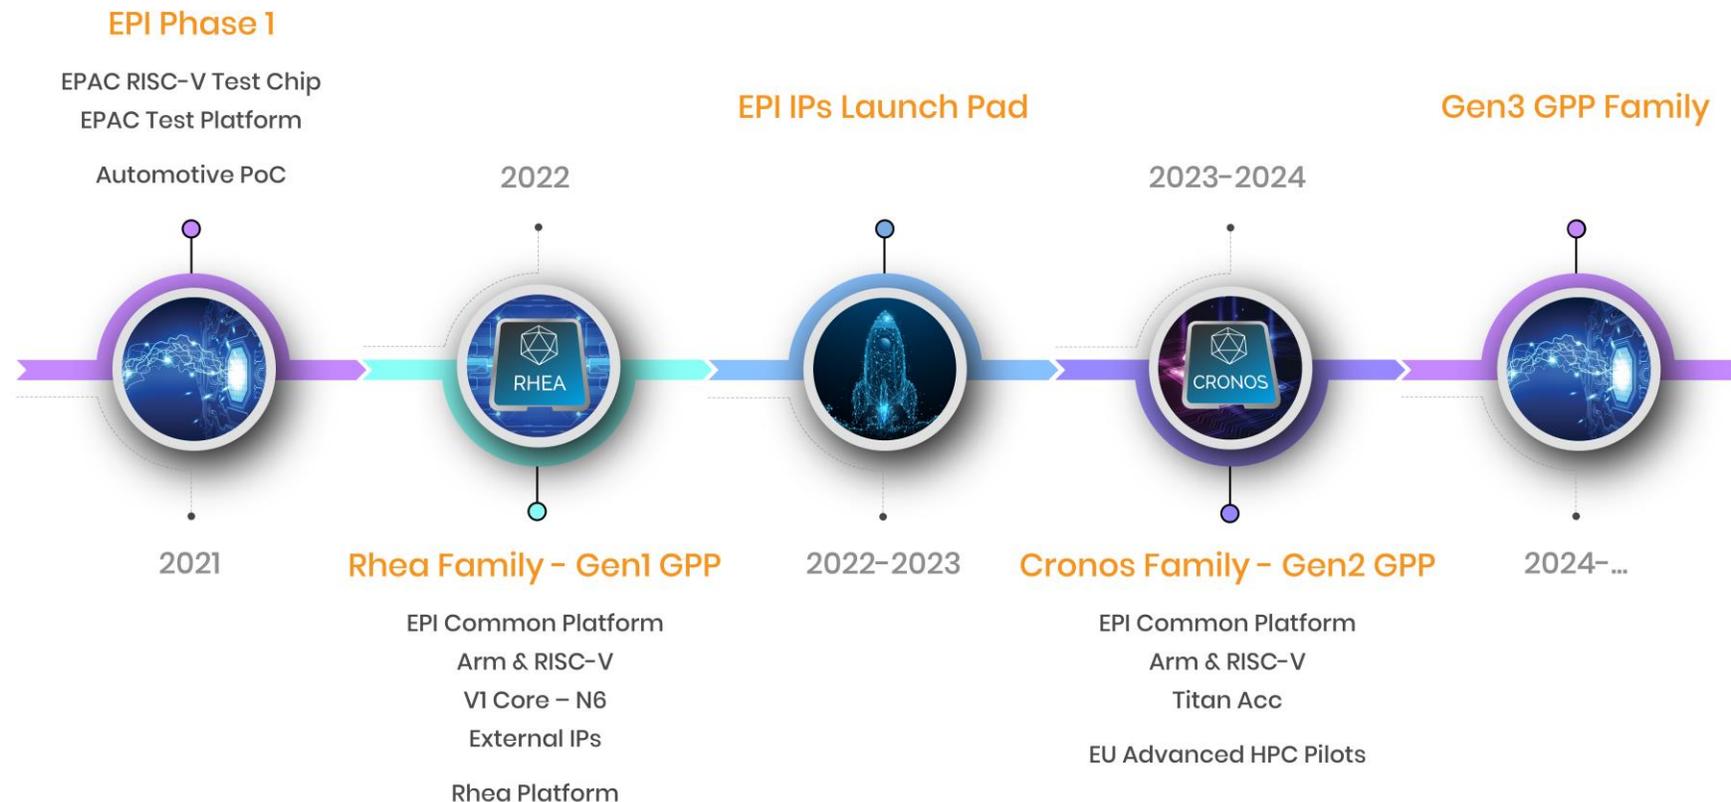

# EPAC – RISC-V ACCELERATOR FOUNDATIONS

- EPAC - EPI Accelerator
- VPU - Vector Processing Unit
- STX - Stencil/Tensor accelerator
- VRP - VaRIable Precision co-processor

# THE EPI EU APPROACH

# EPI ROADMAP

## TO CONCLUDE

- Use of HPC and AI is cornerstone of successful address of societal and global challenges
- Future science, technologies and applications require processing of vast amount of data and there is a large need for efficient HPC
- HPC provides needed competitiveness for industry and society
- The expertise for developing high-end and complex processing units in Europe, after decades of disinvestment
- The European Processor Initiative aims to provide an EU HPC processor, accelerators and system/application design for exascale HPC systems in Europe and around the globe
